

DESCRIPTION and USES

Aqua-Tech Clear is a premium self-sealing waterborne interior furniture, door and cabinet coating that has been designed to meet the needs of finishing shops and painting contractors. It dries quickly to a non-yellowing, high clarity, exceptionally smooth and hard finish, and its self-crosslinking technology has excellent stain, water, mar, and abrasion resistance. **Aqua-Tech Clear** has been optimized for spray application in both a shop setting and use on the job site. **Aqua-Tech Clear** passes the Kitchen Cabinet Manufacturer's Association standards for durability and stain resistance.

SURFACE PREPARATION

All wood surfaces to be finished must be clean, dry and free of contaminants such as oil or wax. Maple and birch should be sanded with 180 grit sandpaper prior to finishing. Oil-based stains should be allowed to dry a minimum of 24 hours before application of topcoat. Previously finished surfaces should be cleaned and thoroughly sanded with 220 grit sandpaper to ensure adhesion.

APPLICATION

Aqua-Tech Clear is intended for application by automated spray equipment, air-assisted airless, and airless spray. Mix or agitate thoroughly before use. Do not apply at temperatures below 60F or relative humidities above 85%.

SAFETY INFORMATION

For complete safety information, refer to the MATERIAL SAFETY DATA SHEET for this product.

COLORS

Aqua-Tech Clear should not be tinted. If tinting is required use **Aqua-Tech 88361** series (White, Mid Base, Ultra Deep Base)
